ANYCOM ARIS-21

Affordable and easy to use

Bluetooth 2.0

Talk time up to 9 hours

Standby up to 170 hours

Only 21 grams

ANYCOM ARIS-21 *Bluetooth Headset*

The **ANYCOM ARIS-21** headset with *Bluetooth* wireless technology comes at a good price without compromising quality or features.

Easy to use: Three separate keys for volume, call management and voice-dialling prevent to, accidentally end a call when you just wanted to adjust the volume.

Comfortable to wear - all day long: Its low weight of only 0.7 ounces / 21 grams, the fact that it can be worn both left and right, and the flexible ear hook, which adjusts to individual preference and proportions, make the **ANYCOM ARIS-21** comfortable to wear over long periods of time.

Superior sound quality: A quality speaker in an acoustically optimised casing and a special microphone always provide excellent communication for both parties of a call.

Large battery capacity: Thanks to its powerful 160 mAh (NiMH) Battery, the **ANYCOM ARIS-21** delivers up to 9 hours talk time, or 170 hours of standby.

Proverbial ANYCOM compatibility: The **ANYCOM ARIS-21** supports both the Headset and Handsfree profiles, which makes it useable with any *Bluetooth*-capable mobile phone. It can also be used with PDAs or PCs that support these profiles. Redialling and voice dialling are possible if the mobile phone has these features.

The Bluetooth word mark and logos are owned by the Bluetooth SIG and any use by ANYCOM is under license
